

# Akshay Ajayan

Tempe, Arizona

✉ iamakshayajayan@gmail.com | 📀 r00tus3r | 🌐 akshay-ajayan

## Personal Profile

Security researcher and CTF player. Arizona State University graduate student. Member of CTF team Shellphish. Experienced in binary analysis, software reverse engineering and linux application development in Python and C.

## Work Experience

### SEFCOM Lab, Arizona State University

Tempe, Arizona

Research Assistant

August 2020 - Present

- Current project focuses on improving fuzzing using target specific seed compression
- Found and reported multiple bugs in linux filesystem drivers
- Collaborated with researchers in multiple projects to improve the security of real world programs
- Research Topics: Binary Analysis, Symbolic Execution, Fuzzing, Taint Analysis, Reverse Engineering, Binary Exploitation

### SEFCOM Lab, Arizona State University

Tempe, Arizona

Research Apprentice

February 2019 - April 2020

- Project: Improving ntfs-3g using differential symbolic execution
- Developed a framework for concolic tracing FUSE API based linux filesystem drivers for NTFS, FAT and VFAT
- Applied techniques like symbolic execution and reverse engineering for this project
- Wrote a Windows kernel driver and a userspace program to directly interface with ntfs.sys driver
- Contributed to open source projects like angr and claripy
- Advised by Dr. Ruoyu "Fish" Wang and Dr. Yan Shoshitaishvili

## Teaching Experience

2023	<b>Teaching Assistant at ASU</b> , CSE 545: Software Security, Assisted Dr. Ruoyu "Fish" Wang	Tempe, USA
2022	<b>Teaching Assistant at ASU</b> , CSE365: Introduction to Information Assurance, Assisted Dr. Ruoyu "Fish" Wang	Tempe, USA
2022	<b>Teaching Assistant</b> , ForAllSecure Hackathon held at ASU	Tempe, USA

## Education

### Arizona State University, Tempe Campus

Arizona, USA

Ph.D. in Computer Science

August 2020 - Present

Advisors: Dr. Ruoyu "Fish" Wang and Dr. Yan Shoshitaishvili

### Amrita Vishwa Vidyapeetham, Amritapuri Campus

Kerala, India

B.Tech. in Computer Science

July 2015 - May 2019

## Achievements

2021	<b>10th Place at HITB PRO CTF Finals</b> , Team Shellphish	Abu Dhabi, UAE
2019	<b>Runners-up at CSAW Embedded Security Challenge</b> , Team Pwndevils	New York, USA
2019	<b>Black Hat Student Scholarship</b> , Black Hat USA	Las Vegas, USA
2018	<b>Finalist at CSAW CTF</b> , Team bi0s	IIT Kanpur, India
2018	<b>Winner of Battle Underground CTF</b> , NullCon International Security Conference	Goa, India
2018	<b>Student Excellence Award</b> , Amrita Vishwa Vidyapeetham	Kollam, India
2017	<b>Second runners-up at Tux of War</b> , Tathva - National level Techfest	NITC, India
2017	<b>Student Excellence Award</b> , Amrita Vishwa Vidyapeetham	Kollam, India

## Vulnerability Research

<b>XFS</b>	CVE-2023-2124
<b>NTFS-3G</b>	CVE-2021-39251, CVE-2021-39252, CVE-2021-39253, CVE-2021-39254, CVE-2021-39255, CVE-2021-39256, CVE-2021-39257, CVE-2021-39258, CVE-2021-39259, CVE-2021-39260, CVE-2021-39261, CVE-2021-39262, CVE-2021-39263
<b>Pillow</b>	CVE-2021-27921, CVE-2021-27922, CVE-2021-27923

## Projects

---

### Platform Independent Programs (PIP-64)

Final year Undergraduate Project

- Made platform independent programs for aarch64 and x64 with focus on it's security implications.
- Successfully created multiple programs valid on both architectures.
- Program can have the same or different behavior depending on the architecture.
- Created a single shellcode valid on multiple architectures.

### Open-source Contribution

Binary analysis and CTF tools

- angr - Binary analysis framework. Made multiple bug fixes, added support for control registers and wrote a few function summaries.
- radare2 - Reverse engineering framework for Unix. Added support for recovering class structure information from gcc compiled binaries.
- r00tEmu - Unicorn engine based emulator for x64 programs. Has basic support for tracing and generating memory/register dumps.
- Differential Debugging: Helper tool for debugging large binaries. Records and highlights executed instructions in IDA.

## Extracurricular Activities

---

### Shellphish CTF Team

Member

- Participated in and won multiple CTF events
- Entered DEF CON CTF finals from 2019 to 2023
- Developed automated tools for attack defense CTFs

*Tempe, USA*

*2019 - Present*

### bi0s CTF Team

Member

- Mentored and lead a team of undergraduates
- Reverse engineered binaries of different architectures and languages
- Participated in and won multiple CTF events
- Organized yearly CTF events InCTF and InCTF Junior
- Hosted workshops for college and school students

*Kollam, India*

*2016 - 2019*

## Skills

---

**Languages** Python, C, C++, Assembly (x86, x64, MIPS, ARM), Bash

**Tools** GDB, IDA Pro, angr, radare2, pwntools, Intel PIN, Git
